

## Club SciKidz MD Health & Wellness Policy

*We not only want to provide your child(ren) with enriching hands-on science and technology experiences and programs, but we want to do so in a safe and healthy environment. In an effort to keep everyone healthy, we have developed the following health policy based on CDC guidelines.*

Your child needs to **stay home if he/she has:**

- Has a **fever** of **100.4** or higher
- Has been **vomiting** or has **diarrhea** (within 24 hours)
- Has **COVID symptoms** such as sore throat, cough, or loss of smell/taste
- Drainage from an ear or eye (may indicate infection)
- Frequent sneezing and coughing. This spreads sickness to others

When can your child **return to camp/program:**

**FEVER-** Campers must be fever free, without the use of medication, for at least 24 hours before returning to camp.

**COVID-** If your child tests positive for COVID, they should stay home until they are fever-free for at least 24 hours without the use of medication and are feeling better. They are encouraged to wear a mask if they are still coughing, especially if they struggle covering their mouth when they cough.

**VOMITING OR DIARRHEA-** Keep your child home for 24 hours after last time he/she vomited or had diarrhea.

**ANTIBIOTICS-** Keep your child home until 24 hours after **the first dose** of antibiotic for anything like ear infection, strep, or pneumonia.

*Thank you for your cooperation in helping keep everyone healthy!*
